Interface Between Igbo Theology and Christianity Akuma-Kalu Njoku, Elochukwu Uzukwu, 2014-10-21 Interface between Igbo

Theology and Christianity is a timely book that provides new scholarly thinking concerning the convergence of Christianity and Igbo Traditional Religion taking place in the Igbo culture area. This book, a fruit of multidisciplinary conversation among Igbo scholars and Igboophiles, offers concepts, themes, issues, and case studies with deep ethnographic details, some of which do not exist anywhere else in print. It is a major statement of how modern Igbo scholars, social scientists, philosophers, theologians, liturgists, and active pastors and parish priests understand the intersection of Igbo Traditional Religion and Christianity in postcolonial Nigeria. The editors and authors of the chapters of this book draw from their wealth of experience to offer to students, scholars, researchers, community-based organizations, and NGOs and practitioners in interfaith dialogue a must-have manual to engage in and develop mutual respect and trust among Christian denominations and between them and Igbo Traditional Religion. This book will serve as a blueprint for a deep dialogue among the Igbo in both city and rural settings in the context of clan and community life context and in the Christian parish setting. The book will certainly appeal to numerous communities in Africa wishing to share similar local experiences and collective memories but which do not have the channels to talk about themselves in scholarly writing.

The Social Science Encyclopedia Adam Kuper, 2004-10-14
The Social Science Encyclopedia first published in 1985 to acclaim from social scientists, librarians, and students, was thoroughly revised in 1996 when reviewers began to describe it as a classic. This third edition has been radically recast. Over half the entries are new or have been entirely rewritten, and most of the balance have been substantially revised. Written by an international team of contributors, the Encyclopedia offers a global perspective on key issues within the social sciences. Some 500 entries cover a variety of enduring and newly vital areas of study and research methods. Experts review theoretical debates from neo-evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences: What is the influence of genes on behaviour? What is the nature of consciousness and cognition? What are the causes of poverty and wealth? What are the roots of conflict, wars, revolutions, and genocidal violence? This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society.
