The Grant Center for Outdoor Education gives student groups experience in studying nature and helping to restore the environment for fish, birds, and animals. The number of seedling trees that can be planted in one day depends on the number of students in the work group. Data from several different work groups is shown in the next graph. Draw a line that best fits the pattern in [workers, trees] data.

Answer the following questions on a separate sheet of paper.

1. Estimate how many trees will be planted by a work crew of 14. Explain how you find your answer.
2. Estimate how many workers will be required to plant 500 trees. Explain how you find your answer.
3. Write an equation for the graph model relating trees planted to number of workers.
4. What does that slope tell about the relationship between the variables?

A. Elliott,2022-11-28 Chance fills every day of our lives and affects every decision we make Yet for something woven so closely into the fabric of our being we are not very good at thinking about uncertainty and risk In this

lively and engaging book Andrew C A Elliott asks why this is so He picks at the threads and in showing how our world is built on probability rather than certainty he identifies five obstacles to thinking about uncertainty that confuse us time after time Elliott takes us into the casino but this is not an invitation to gamble He looks at financial markets but this is not a guide to investment There s discussion of health but this is not a medical book He touches on genetics and evolution and music making and writing because chance is at work there too Entering many different fields What are the Chances of That is always following the trail of chance and randomness One purpose of the book is to go cross country to show that there are connected ways of thinking that disrespect boundaries and cut across the domains of finance and gambling and genetics and public health and creativity Through it one visits the vantage points that give a broad view of the landscape and sees how these different areas of life and knowledge are connected through chance What are the Chances of That discusses chance and the importance of understanding how it affects our lives It goes beyond a mathematical approach to the subject showing how our thinking about chance and uncertainty has been shaped by history and culture and only relatively recently by the mathematical theory of probability In considering how we think about uncertainty Elliott proposes five dualities that encapsulate many of the ambiguities that arise Developing Creativity In The Primary School Jesson, Jill, 2012-09-01 This informative book brings together theory research and practice examples of creativity in primary schools providing a scholarly yet accessible introduction The book offers an overview for teachers looking for a concise guide to current thinking about creativity particularly if your school is thinking of introducing or extending its practice The book considers recent developments in the creative curriculum and techniques embedded in approaches such as Philosophy for Children Mantle of the Expert and Enterprise Education Ideas for personalising teaching and creating independent and motivated learners are incorporated Other key features of the book include Examination of the major theories of creativity How to develop your own creativity as a teacher Focus on the difference between developing group and individual creativity Innovative ideas for creativity in subject teaching Practical examples and Creative Challenges throughout The book draws on the author s many years of experience of working with children in schools working on Creative Partnerships and Higher Education in the Arts HEARTS projects and ideas developed through working in initial teacher training This book is essential reading for students in the early stages of their teacher training course as well as for practising teachers looking for innovative ideas and guidance on developing creativity in themselves and their classrooms This is an interesting book which explores theory practice and policy of creativity in the primary classroom Jill Jesson links five key creative behaviours drawn together initially by then policymakers QCA with what she identifies as six areas of creative endeavour Primary teachers committed to developing a creative curriculum will find much material in this lively book that supports their personal and professional creativity as well as suggestions for classroom practice in developing individual and group work Professor Anna Craft University of Exeter and The Open University UK This is a compulsory read for all those interested in developing the creative
