public lands in the western United States concluding that constructive changes could be implemented The Wild Horse and Burro Program has not used scientifically rigorous methods to estimate the population sizes of horses and burros to model the effects of management actions on the animals or to assess the availability and use of forage on rangelands Evidence suggests that horse populations are growing by 15 to 20 percent each year a level that is unsustainable for maintaining healthy horse populations as well as healthy ecosystems Promising fertility control methods are available to help limit this population growth however In addition science based methods exist for improving population estimates predicting the effects of management practices in order to maintain genetically diverse healthy populations and estimating the productivity of rangelands Greater transparency in how science based methods are used to inform management decisions may help increase public confidence in the Wild Horse and Burro Program      Community Health and Wellness - E-book Jill Clendon,Ailsa Munns,2014-10-01 Community Health both fly in fly out FIFO families      *Trauma-informed education* Helen Elizabeth Stokes,Tom Brunzell,Judith Howard,2023-09-08      *Popular Photography* ,1991-01      Backpacker ,2000-03 Backpacker brings the outdoors straight to the reader s doorstep inspiring and enabling them to go more places and enjoy nature more often The authority on active adventure Backpacker is the world s first GPS enabled magazine and the only magazine whose editors personally test the hiking trails camping gear and survival tips they publish Backpacker s Editors Choice Awards an industry honor recognizing design feature and product innovation has become the gold standard against which all other outdoor industry awards are measured      *Popular Photography* ,1992-06      **Popular Photography** ,1992-07      The Writers Directory ,2013
