Internal Revenue Service, 2003 **Survey of Current Business**, 1976 *Insufficient Funds* Rebecca M. Blank, Michael S. Barr, 2009-03-26 One in four American adults doesn't have a bank account Low income families lack access to many of the basic financial services middle class families take for granted and are particularly susceptible to financial emergencies unemployment loss of a home and uninsured medical problems Insufficient Funds explores how institutional constraints and individual decisions combine to produce this striking disparity and recommends policies to help alleviate the problem Mainstream financial services are both less available and more expensive for low income households High fees minimum balance policies and the relative scarcity of banks in poor neighborhoods are key factors Michael Barr reports the results of an in depth study of financial behavior in 1 000 low and moderate income families in metropolitan Detroit He finds that most poor households have bank accounts but combine use of mainstream services with alternative options such as money orders pawnshops and payday lenders Barr suggests that a tax credit for banks serving primarily disadvantaged customers could facilitate greater equality in the private financial sector Drawing on evidence from behavioral economics Sendhil Mullainathan and Eldar Shafir show that low income individuals exhibit many of the same patterns and weaknesses in financial decision making as middle class individuals and could benefit from many of the same financial aids They argue that savings programs that automatically enroll participants and require

them to actively opt out in order to leave the program could drastically increase savings ability Ronald Mann demonstrates that significant changes in the credit market over the past fifteen years have allowed companies to expand credit to a larger share of low income families Mann calls for regulations on credit card companies that would require greater disclosure of actual interest rates and fees Raphael Bostic and Kwan Lee find that while home ownership has risen dramatically over the past twenty years elevated risks for low income families such as foreclosure may well outweigh the benefits of owning a home The authors ultimately argue that if we want to demand financial responsibility from low income households we have an obligation to assure that these families have access to the banking credit and savings institutions that are readily available to higher income families Insufficient Funds highlights where and how access is blocked and shows how government policy and individual decisions could combine to eliminate many of these barriers in the future

21st Century Economics: A Reference Handbook Rhona C. Free, 2010-05-14 Interest in economics is at an all time high Among the challenges facing the nation is an economy with rapidly rising unemployment failures of major businesses and industries and continued dependence on oil with its wildly fluctuating price Americans are debating the proper role of the government in company bailouts the effectiveness of tax cuts versus increased government spending to stimulate the economy and potential effects of deflation Economists have dealt with such questions for generations but they have taken on new meaning and significance Tackling these questions and encompassing analysis of traditional economic theory and topics as well as those that economists have only more recently addressed 21st Century Economics A Reference Handbook is intended to meet the needs of several types of readers Undergraduate students preparing for exams will find summaries of theory and models in key areas of micro and macroeconomics Readers interested in learning about economic analysis of an issue as well students embarking on research projects will find introductions to relevant theory and empirical evidence And economists seeking to learn about extensions of analysis into new areas or about new approaches will benefit from chapters that introduce cutting edge topics To make the book accessible to undergraduate students models have been presented only in graphical format minimal calculus and empirical evidence has been summarized in ways that do not require much background in statistics or econometrics It is thereby hoped that chapters will provide both crucial information and inspiration in a non threatening highly readable format
