Theory and Engineering of Complex Systems and Dependability Wojciech Zamojski,Jacek Mazurkiewicz,Jarosław Sugier,Tomasz Walkowiak,Janusz Kacprzyk,2015-06-14 Building upon a long tradition of scientific conferences dealing with problems of reliability in technical systems in 2006 Department of Computer Engineering at Wrocław University of Technology established DepCoS RELCOMEX series of events in order to promote a comprehensive approach to evaluation of system performability which is now commonly called dependability Contemporary complex systems integrate variety of technical information software and human users administrators and management resources Their complexity comes not only from involved technical and organizational structures but mainly from complexity of information processes

that must be implemented in specific operational environment data processing monitoring management etc In such a case traditional methods of reliability evaluation focused mainly on technical levels are insufficient and more innovative multidisciplinary methods of dependability analysis must be applied Selection of submissions for these proceedings exemplify diversity of topics that must be included in such analyses tools methodologies and standards for modelling design and simulation of the systems security and confidentiality in information processing specific issues of heterogeneous today often wireless computer networks or management of transportation networks In addition this edition of the conference hosted the 5th CrISS DESSERT Workshop devoted to the problems of security and safety in critical information systems
