

Trane EnviroWise™ Geothermal Systems are available in one of three applications. Your Trane dealer can determine which system is right for your home.

### Packaged systems.

These all-in-one systems circulate fluid through the earth, and through a coil that absorbs or dissipates heat depending on the season.

#### TGVX

The Trane TGVX series offers the ultimate in performance with an EER surpassing 40 and a COP over 5. Utilizing a true variable capacity compressor and variable speed blower with a fully communicating control package, this system offers comfort and efficiency at the highest level possible.

#### T2GX / T1GX

Trane's most selected packaged geothermal solution, offering the best features and efficiencies up to 29.4 EER efficiency and available in single and two-stage. The variable speed blower motor offers up to 12 airflow selections, to keep your comfort even and efficient. Optional heating for your water supply is available.

#### T2GY

A rating of up to 23.7 EER and two-stage heating and cooling mean you'll enjoy incredible comfort and efficiency from a combination of forced air heating, forced air cooling, radiant heat and a dedicated hot water heater. Variable speed airflow offers 12 different settings, and optional heating for your water needs is available.

### Split systems.

These systems use a ground loop connected to a refrigerant loop to absorb or dissipate heat, working more like a traditional heating and cooling system with an air handler or furnace inside your home.

#### T2GN (indoor)

These two-stage systems offer up to 33.1 EER, and work in conjunction with an air handler or furnace for enhanced indoor comfort. The GN system also offers optional heating for your water needs.

#### T2GE (outdoor)

Like the GN, this system offers the comfort of two-stage heating and cooling. It works in conjunction with an air handler, or with an indoor furnace to provide consistent temperatures from two different sources. The GE system has all geothermal components outside your home, therefore minimizing the space requirements inside.

#### Hyperion XL (indoor air handler)

Trane has engineered a model series of the Hyperion XL to specifically match with our EnviroWise geothermal heat pumps. The Hyperion XL's unique cabinet design meets the 2% energy loss standard and eliminates condensation. It also allows less moisture and fewer dust particles to be drawn in from garages, attics or crawl spaces.

### Water heating and cooling systems.

These systems circulate the fluid through the earth, transferring heat to and from another fluid loop built into your home. They are ideal for radiant floor heating applications and can be used with select models of our Hyperion XL air handler and accessory water coil to deliver heated and cooled air through a ducted air system.

#### T1GW

Offers the efficiency of up to 17.5 EER and single-stage heating and cooling. Maintains comfortable temperatures through radiant heating and cooling, while providing hot water for daily use.

#### T2GW

For larger size applications and an efficiency of up to 22.5 EER, along with the flexibility of two-stage water heating and cooling.

### EER and Savings

The efficiency of any geothermal unit is measured by its EER, or Energy Efficiency Ratio. The higher the EER, the less energy your geothermal system uses to heat and cool your home, and the more you'll save every month.
