"Kelly" Flory, Jr.,2008-11-24

The automotive industry underwent great change in the 1960s and the early 1970s. The continuing trend toward market consolidation, the proliferation of sizes and nameplates and the need for speed characterized this period loosely labeled as the muscle car era. This is an exhaustive reference work to American made cars of model years 1960-1972. Organized by year and summarizing the market annually, it provides a yearly update on each make's status and production figures, then details all models offered for that year. Model listings include available body styles, base prices, engine and transmission choices, power ratings, standard equipment, major options and their prices, curb weight and dimensions, interior and exterior paint color choices, changes from the previous year's model and sales figures. Also given are assembly plant locations and historical overviews of each model nameplate. The book is profusely illustrated with 1,018 photographs. **Volume Electron**

Presents real tips and tricks you won't get from standard research papers. *Thomas Register of American Manufacturers*, 2003. Vols for 1970-71 include manufacturers catalogs. [Automobile Quarterly](#), 1988.

**Emerging Model Organisms**, 2009. Until recently, a small number of model organisms has been the focus of most research in molecular, cellular and developmental biology. But in the last few years, due in part to increased interest in questions of evolution, technical advances in selectively altering gene expression patterns and reduced costs of genome sequencing, the range of organisms used for research is greatly expanding. *Emerging Model Organisms* Volume 1 introduces the reader to this new generation of model organisms, providing a diverse catalog of potential species useful for extending research in new directions. In this volume, leading experts provide chapters on 23 emerging model systems ranging from bat and butterfly to cave fish and choanoflagellates, cricket and finch to quail, snail and tomato. Subsequent releases of the *Emerging Model Organisms* series already in preparation will focus on additional species. Richard Behringer, Rob Krumlauf.
