Paper Speaking Past Analysis:

Speech Analysis, Synthesis and Perception James L. Flanagan, 2013-06-29 This book has its origin in a letter In November of 1959 the late Prof Dr WERNER MEYER EpPLER wrote to me asking if I would contribute to a series he was planning on Communication His book Grundlagen und Anwendungen der Informationstheorie was to serve as the initial volume of the series After protracted consideration I agreed to undertake the job provided it could be done outside my regular duties at the Bell Telephone Laboratories Shortly afterwards I received additional responsibilities in my research organization and felt that I could not conveniently pursue the manuscript Consequently except for the preparation of a detailed outline the writing was delayed for about a year and a half In the interim Professor MEYER EpPLER suffered a fatal illness and Professors H WOLTER and W D KEIDEL assumed the editorial responsibilities for the book series The main body of this material was therefore written as a leisure time project in the years 1962 and 1963 The complete draft of the manuscript was duplicated and circulated to colleagues in three parts during 1963 Valuable comments and criticisms were obtained revisions made and the manuscript submitted to the publisher in March of 1964 The mechanics of printing have filled the remaining time If the reader finds merit in the work it will be owing in great measure to the people with whom I have had the good fortune to be associated

Esman,1990-09 A collection of central papers on transference the psychoanalytic phenomenon of adult repetition of childhood experiences Among Freud s discoveries none has proved more theoretically valid or clinically productive than his demonstration that humans regularly and inevitably repeat with the analyst patterns of relationship fantasy and conflict experienced in their childhood Transference phenomenon and its analysis in therapy is the cornerstone for much psychoanalytic work It s crucial importance has been and continues to be a matter of debate among psychoanalysts

Essential Papers on Transference presents the central papers on the subject of transference from Freud's time to our own. Although many reflect viewpoints within the psychoanalytic mainstream, efforts have been made to be as inclusive as possible; thus neo-Freudian, Kohutian, and Lacanian statements are represented. The book underscores the fact that the meaning of the therapeutic use and even the theoretical explanation of transference and transference phenomena have undergone significant changes over the years.
