Wasted Education John D. Skrentny, 2023-11-17 We are living in an era of veritable STEM obsession Not only do tech companies dominate our cultural imagination of American enterprise and financial growth we urgently need science based solutions to impending crises As a society we have poured enormous resources into cultivating young minds for STEM careers The US sponsors 209 distinct STEM education programs in 13 different federal agencies at a cost of more than 3 billion This spending is on top of countless initiatives from philanthropic foundations and corporate giving And yet we are facing a STEM worker crisis In this project sociologist John D Skrentny asks if we re investing so much in STEM education why are as many as 75% of graduates with STEM degrees opting out of STEM careers The problem is not education he argues but the available jobs Skrentny aims to bring a reality check to America s growing dedication to STEM education Each chapter highlights an aspect of STEM work culture that drives away bright minds ranging from workplace culture and burn and churn management practices to lack of job security to the constant need for training on new innovations to the racism and sexism that exclude non white and Asian people and women Skrentny shows that if we have any hope of crafting science based solutions to many of our most urgent societal issues we have to change the way we re treating these workers on whom our future depends

Imagining Indus Zafar Adeel, Robert G. Wirsing, 2016-10-20 This volume calls upon over a dozen Indus observers to imagine a scenario for the Indus basin in which transboundary cooperation over water resources overcomes the insecurity arising from water dependence and scarcity From diverse perspectives its essays examine the potential benefits to be gained from revisiting the 1960 Indus Waters Treaty as well as from mounting joint efforts to increase water supply to combat climate change to develop hydroelectric power and to improve water management The Indus basin is shared by four countries Afghanistan China India and Pakistan The basin s significance stems in part simply from the importance of these countries three of them among the planet s most populous states one of them boasting the world s second largest economy and three of them members of the exclusive nuclear weapons club However the basin s significance stems also from the great importance of the Indus waters themselves due especially to the region s massive dependence on irrigated agriculture as well as to the menace of climate change and advancing water scarcity The Indus this volume imagines is a definite departure from business as usual responses to the Indus basin s emerging fresh water crisis The objective is to kindle serious discussion of the cooperation needed to confront what many water experts believe is

developing into one of the planet's most gravely threatened river basins. It is thus both an assessment of the current state of play in regard to water security in the Indus basin and a recommendation about where to go from here. Scholarly Digital Editions as Interfaces Roman Bleier, Martina Bürgermeister, Helmut W. Klug, Frederike Neuber, Gerlinde Schneider, 2018-11-15

Interfaces are important elements of digital scholarly editions as they allow and direct the interaction of users with the online content and they facilitate the access to and exchange of data and information. Some interfaces are created for the human user GUI, others for machine interaction and data exchange API. Both aspects of interfaces and their roles in digital scholarly editing were discussed at a conference in 2016 organised by the Centre for Information Modelling at the University of Graz and the Digital Scholarly Editions Initial Training Network DiXiT. This volume includes a range of papers presented at the conference that highlight the diverse views and approaches towards interfaces in the digital scholarly editing community. **Handbook of Innovative Career Counselling** Jacobus G. Maree, 2019-07-20

This book examines a topic widely regarded as the most pressing in career counselling today, i.e. how to ensure that everyone receives career counselling and that all workers have the opportunity to engage in sustainable decent work. The author holds that career counselling should not only advance workers' self and career construction, helping them design successful career lives and make social contributions and live purposeful lives; it should also expound new theoretical approaches and interventions. Furthermore, the book criticizes global society for overlooking the basic needs of many workers, especially the most vulnerable and disadvantaged. An important feature of the book is its emphasis on promoting a creative and innovative approach to career counselling so as to better answer contemporary career-related questions. It offers guidance on how to advance entrepreneurship and help workers develop critical thinking, curiosity, creativity, collaboration, and communication skills. In this way, the book promotes innovation in career counselling and maps the way forward in a theoretical and practical manner that helps clients flourish rather than merely survive in turbulent times impacted by the fourth wave in psychology, career counselling, the economy, as well as the 4th industrial revolution.
