**Traduction et Veille stratégique multilingue** , **Traduction et veille stratégique multilingue** Mathieu Guidère,2008-05-01    **Translation and Interdisciplinarity** Faruk Yücel,Mehmet Tahir Öncü,2022-12-12

Interdisciplinarity is significant in the age of globalization and digitalization It creates new opportunities through comparison and analysis of different findings and methods Furthermore it expands the boundaries of each discipline each topic or phenomenon can be viewed under a whole new light Instead of conventional or traditional methods interdisciplinary cooperation can lead to innovative approaches that can contribute to the value of each discipline involved It also requires respect and recognition between disciplines their independent positions could be questioned or justified based on their interrelationship Moreover interdisciplinary work brings together diverse experts who cooperate and share their findings with each other In this sense interdisciplinarity can be seen as a dialogue between disciplines In this complex interaction a third field may emerge that transcends the boundaries of each independent discipline Since relatively young Translation Studies has long been influenced by other disciplines its boundaries could be defined through interdisciplinarity In this book numerous translation scholars engage with the relationship between translation and other disciplines Translation here is not only to be understood as a transmission of texts but in a broader sense as denoting a transformation of different phenomena that could be studied both as a product and as a process    *Traduction et veille stratégique multilingue* Mireille

Azoulay,2006-03-01    *Traduction et veille stratégique multilingue* Mathieu Guidère,2008    *Language for Specific Purposes* Giuliana Elena Garzone,Dermot Heaney,Giorgia Riboni,2017-01-06 This volume brings together work by both well known scholars and emerging researchers in the various areas of Language for Specific Purposes LSP such as political legal medical and business discourse The volume is divided into three parts in order to align rather than separate three different but related aspects of LSP namely translation linguistic research and domain specific communication on the web Underlying all the contributions here is the growing awareness of the ever increasing multiformity of specialised communication and the ever wider social implications of the communicative situations in which it is embedded especially where it involves the need to move across languages cultures and modes as in translation and interpreting The contributions consistently bear witness to the need to review received notions pose new questions and explore fresh perspectives The picture that emerges is one of extreme complexity in which researchers into specifically linguistic aspects of LSPs and their translation across languages and media declare their awareness of the pressing need to come to terms with a wide range of social pragmatic intercultural and political factors above and beyond socio technical knowledge of the domains under investigation    **The Economics of the Multilingual Workplace** François Grin,Claudio Sfreddo,François Vaillancourt,2011-01-25 This book proposes a path breaking study of the economics of multilingualism at work proposing a systematic approach to the identification and measurement of the ways in which language skills and economic performance are related Using the instruments of economic

investigation but also explicitly relating the analysis to the approaches to multilingualism at work developed in the language sciences this interdisciplinary book proposes a systematic step by step exploration of the issue Starting from a general identification of the linkages between multilingualism and processes of value creation it reviews the contributions of linguistics and economics before developing a new economic model of production in which language is taken into account Testing of the model using data from two countries provides quantitative estimations of the influence of multilingualism on economic processes showing that foreign language skills can make a considerable contribution to a country's GDP These findings have significant implications for language policy and suggest strategies helping language planners to harness market forces for increased effectiveness A technical appendix shows how the novel technical and statistical procedures developed in this study can be generalized and applied wherever researchers or decision makers need to identify and measure the value of multilingualism

*The Evaluation of Language Regimes* Michele Gazzola, 2014-08-15 Building on existing analytical frameworks this book provides a new methodology allowing different language policies in international multilingual organisations or language regimes to be compared and evaluated on the basis of criteria such as efficiency and fairness It explains step by step how to organise the evaluation of language regimes and how to design and interpret indicators for such evaluation The second part of this book applies the theoretical framework to the evaluation of the language policy of the Patent Cooperation Treaty PCT division of the World Intellectual Property Organisation WIPO and the European Patent Office EPO Results show that an increase in linguistic diversity of the language regimes of patent organisations can both improve the efficiency of the patent system and lead to a more balanced distribution of costs among countries This book is a resource for scholars in language policy and planning and for policy makers in the international and European patent system
