Report Designer Component XI

Creating an RDC Distribution Package

Overview

An application designed using Report Designer Component (RDC) requires that multiple dynamic-link libraries (DLLs) are present on a client computer for the application to install and run successfully. Although most of the DLLs are Crystal Reports DLLs, there are some required Microsoft DLLs as well.

This document discusses the process of creating an RDC distribution package to distribute an RDC application.

programmer has been using Crystal Reports for years and is mostly concerned with how to do technical runtime customization of reports For this programmer I researched and diagrammed the undocumented report object models I included dozens of examples in both VB NET and C to show you how to modify reports manipulate different data sources XML ADO NET ODBC OLE DB stored procedures with parameters modify formulas and report parameters and integrate NET with the RAS and RDC The dozens of emails I received when the book was online were instrumental for doing a major revision of many chapters before publishing the book in hardcopy format Since releasing the book I continue to receive more emails from people They regret that the free book isn t online anymore but understand that it couldn t last forever and that the hardcopy version is even better I hope you like it and that it helps you achieve your reporting goals September 2004 Update Due to high demand I did a second printing of the book I took advantage of this opportunity to go through the book and remove all grammatical errors The content is the same but the typos have been corrected   Real World Enterprise Reports Using VB6 And VB .NET Carl Ganz,2013-11-09 Although reports are frequently overlooked in applications until the end of the development process they often represent the key selling points to management as a software application s primary value lies in its output Real World Enterprise Reports Using VB6 and VB NET discusses report writing from a developer s perspective Author Carl Ganz Jr covers programming reports using such tools as VSView Preview and ActiveReports The programmatic interface offered by Crystal Reports and the delivery of reports to handheld wireless devices are also examined   **Deploying Visual FoxPro Solutions** Rick Schummer,Rick Borup,Jacci Adams,2004 Ship it Music to your ears or words that cause a cold sweat as you realize you now need to deploy the solution you have worked on for so long Have you planned the deployment Do you have the proper language in your contract with your customer Do you have the proper install package What media is the package going to be shipped on to the client How will it be distributed What happens after Setup exe finishes Do you have the support infrastructure in place How are you going to handle updates and changes There s a lot to think about and deploying a solution requires careful planning These questions and many more are answered based on real world experience within the pages of this book   Integrating and Extending BIRT Jason Weathersby,Tom Bondur,Iana Chatalbasheva,2012 The world wide developer community has downloaded over ten million copies of BIRT Business Intelligence and Reporting Tools Built on the open source Eclipse platform BIRT is a powerful reporting system that provides an end to end solution from creating and deploying reports to integrating report capabilities in enterprise applications Integrating and Extending BIRT Third Edition introduces programmers to BIRT architecture and the reporting framework BIRT technology makes it possible for programmers to build customized reports using scripting and BIRT APIs This book also includes extensive examples of how to use the Eclipse Plug in Development Environment to build plug ins to extend the features of the BIRT framework The source code for these examples is available for download at www eclipse org birt Key topics covered include Installing and deploying BIRT Deploying a BIRT report to an application server
