

The Divorce Effects on Children

✓ Exclusively available on IvyPanda

Introduction

Divorce involves restructuring of the family where parents separate. When people get married, they get children in the union and who are under the care of both parents. Divorce causes emotional and psychological strain among the parents. The process of divorce is very involving and parents end up as opponents and seek to be independent (Roderick 6).

After divorce the parents reside in different houses and have to settle with the other about the custody of children. In most cases the children remain in custody of the mother. Although some people believe that parents absorb the major effects of divorce, I believe that divorce has a big effect on children than parents.

Discussion on how effects of divorce on children are more than effects on the parents

Emotional effects

According to Friedman (17), when parents divorce the family members are affected. The children as well as the parents have to adjust to changes and may take up to two years to settle down.

They often have emotions that are triggered by the divorce. In cases where children exposed and saw the parents engage in conflict, children find it more comfortable to live with a single parent and be not see the parents engage in quarrels.

On the other hand, some parents keep their differences secret from the children. When they divorce, such children usually have a harder time to cope with the change than children who knew their parents differences. Therefore parents can live in a marriage for the sake of the children.

Women, Work, and Divorce Richard R. Peterson,1989-03-09 This book considers how women cope with the economic hardship which accompanies divorce using national longitudinal data on a generation of women in the United States These women came of age at a time when they were expected to give priority to family roles over work roles Yet by the time many of them were divorced in the 1970s with the climate of changing perceptions of gender roles women were expected to work and were unprepared for the economic disruption caused by divorce Peterson analyzes the experiences of women drawing upon sociological and economic approaches to the study of labor market outcomes and of life cycle events He shows how over the long term most divorced women can make at least a partial recovery but divorced women with children have a more difficult time making work adjustments and experience greater economic deprivation Given the continuing high rates of divorce Peterson s findings highlight the importance of work rather than marriage for women s economic security

Handbook of Marriage and the Family Suzanne K. Steinmetz,Marvin B. Sussman,2013-11-11 The lucid straightforward Preface of this Handbook by the two editors and the comprehenSIve perspec

tives offered in the Introduction by one of them leave little for a Foreword to add. It is therefore limited to two relevant but not intrinsically related points vis à vis research on marriage and the family in the interval since the first Handbook. Christensen 1964 appeared, namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook. In the late 1930s Willard Waller noted: Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it. Everything that concerned the life of men and women and their children was shrouded from the light. Today much of that has been changed. Gone is the concealment of the way in which life begins, gone the irrational sanctity of the home. The aura of sentiment which once protected the family from discussion clings to it no more. We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting. We are engaged in the process of reconstructing our family institutions through criticism and discussion. 1938 pp 3-4
