Digital Personalized Health and Medicine L.B. Pape-Haugaard, C. Lovis, I. Cort Madsen, 2020-06-17. Digital health and medical informatics have grown in importance in recent years and have now become central to the provision of effective healthcare around the world. This book presents the proceedings of the 30th Medical Informatics Europe conference MIE. This edition of the conference hosted by the European Federation for Medical Informatics EFMI since the 1970s was due to be held in Geneva, Switzerland, in April 2020 but as a result of measures to prevent the spread of the Covid-19 pandemic the conference itself had to be cancelled. Nevertheless, because this collection of papers offers a wealth of knowledge and experience across the full spectrum of digital health and medicine, it was decided to publish the submissions accepted in the review process and confirmed by the Scientific Program Committee for publication, and these are published here as planned. The 232 papers are themed under 6 section headings: biomedical data tools and methods supporting care delivery; health and prevention; precision medicine and public health; human factors and citizen-centered digital health; and ethics, legal and societal aspects. A 7th section deals with the Swiss personalized health network, and section 8 includes the 125 posters accepted for the conference. Offering an overview of current trends and developments in digital health and medical informatics, the book provides a valuable information resource for researchers and health practitioners alike.
