

Unit 4- Sensation and Perception

1. Basic Principles of sensation and Perception

- A. **Selective Attention:** Your brain is really only able to process one or 2 things at a time and you can't focus on everything else around you.

-Selective Attention and Accidents:
Multitasking biologically distracts the brain resources allocated to driving which causes accidents.

-Selective Inattention: At the level of conscious awareness, we are blind except for the tiny bit of the world we see. Inattention blindness is failing to see visible objects because our full attention is directed somewhere else.

- B. **Transduction:** Our sensory system converts forms of energy to others through 3 steps.
1. Receive stimulation, 2. Transform into neural impulses, 3. Deliver to our brains.
The process of conversion in our brain is transduction.

Sensation And Perception Myers Answers Study Guide
