Oracle® Solaris 11 System Administration Bill Calkins, 2013-06-21 Oracle Solaris 11 System Administration covers every skill required to effectively install and administer the Oracle Solaris 11.1 operating system in production environments. It features dozens of step-by-step learn-by-example procedures demonstrating how to apply complex solutions in real-world data center environments. Author Bill Calkins has administered and taught Oracle Solaris and its predecessors for more than twenty years. He also helped develop the newest Oracle Certified Associate OCA and Oracle Certified Professional OCP exams which raise the bar for Solaris certification. This guide covers every new 1Z0-821 exam topic in detail and also covers many 1Z0-822 exam topics. Calkins also reviews the changes that system administrators will face when upgrading to Solaris 11.1 and presents new ways to perform familiar tasks on both SPARC and x86 hardware. You will learn how to install the Solaris 11 Operating Environment with Live Media or Text Interactive installers. Install, manage, and update software with the Image Packaging System and IPS repositories. Understand, customize, and troubleshoot SPARC and x86 boot processes from system power-up to loading the OS, including coverage of ILOM, OpenBoot, and GRUB 2. Administer and create services through the service management facility SMF. Configure system messaging using SMF notifications, syslog, and rsyslog. Configure and administer ZFS storage pools, including ZFS on the boot drive, local disks, LUNs, and a SAN. Configure and manage ZFS file systems, encryption, redundancy, snapshots, clones, network sharing, monitoring, device replacement, and legacy UFS migration. Create, migrate, contain, and administer zones, including Solaris 10 branded and immutable zones. Use RBAC to create custom rights profiles and grant special privileges. Manage and monitor system process scheduler, including FSS process schedulers and proc tools. Configure Solaris networking and network services, including Reactive and Fixed Network Configurations, VNICs, and Virtual Networking. A companion website, unixid.com/solaris11book.html, includes new 1Z0-821 and 1Z0-822 study strategies and self-assessment exams.
