Numerical Mathematics and Advanced Applications Miloslav Feistauer, Vit Dolejší, Peter Knobloch, Karel Najzar, 2004-08-12 These proceedings collect the major part of the lectures given at ENU MATH2003 the European Conference on Numerical Mathematics and Ad vanced Applications held in Prague Czech Republic from 18 August to 22 August 2003 The importance of numerical and computational mathematics and sci entific computing is permanently growing There is an increasing number of different research areas where numerical simulation is necessary Let us men tion fluid dynamics continuum mechanics electromagnetism phase transi tion cosmology medicine economics finance etc The success of applications of numerical methods is conditioned by changing its basic instruments and looking for new appropriate techniques adapted to new problems as well as new computer architectures The ENUMATH conferences were established in order to provide a forum for discussion of current topics of numerical mathematics. They seek to convene leading experts and young scientists with special emphasis on con tributions from Europe Recent results and new trends are discussed in the analysis of numerical algorithms as well as in their applications to challenging scientific and industrial problems The first ENUMATH conference was organized in Paris in 1995 then the series continued by the conferences in Heidelberg 1997 Jyvaskyla 1999 and Ischia Porto 2001 It was a great pleasure and honour for the Czech numerical community that it was decided at Ischia Porto to organize the ENUMATH2003 in Prague It was the first time when this conference crossed the former Iron Courtain and was organized in a postsocialist country The Messenger of Mathematics, 1876 **Problems in** the Constructive Trend in Mathematics, IV V. P. Orevkov, M. A. Sanin, 1970 Foundations of Data Organization and Algorithms Witold Litwin, 1989-06-07 The Third International Conference on Foundations of Data Organization and Algorithms has been organized by INRIA in Paris from June 21 to 23 1989 Previous FODO Conferences were held in Warsaw 1981 and in Kyoto 1985 The goal of this year's conference is to present advances in techniques of permanent and temporary data organization in different fields New applications such as image processing graphics geographic data processing robotics office automation information systems language translation and expert systems have developed various data organizations and algorithms specific to the application requirements The growing importance of these applications has created a need for general studies on data organization and algorithms as well as for specific studies on new database management systems and on filing services. The articles submitted for the conference were subject to the usual rigorous reviewing process and selected on that basis They offer an excellent snapshot of the state of the art in the field and should prove invaluable for computer scientists faced by the problems of data organization which are raised by these new applications **Bulletin** Institute of Mathematics and Its Applications, 1994 Applied Mathematics and Computational Mechanics for Smart Applications Lakhmi C.
