

Semester 2: Cognitive and Biological Approach

Final Exam Study Guide

Section 1

Cognitive Psychology

Focuses on how the interactions of thinking, emotion, creativity, and problem-solving abilities affect how and why you think the way you do.

Cognitive psychologists argued that scientific psychology should include research on mental processes.

These mental processes include:

- Perception,
- Thinking,
- Decision-making,
- Problem-solving,
- Memory
- Language
- Attention

We must be cognitive misers, we often make the choice not to actively process information

- IDK
- IDC
- IDHT

Section 2

Memory

There are many different types of memory and there is no one such thing which can be called "memory." We now define it as learning that has persisted over time; it is information that has been acquired, stored, and can be retrieved.

The two main pieces are Short Term and Long Term Memory.

- **Short Term:** sensory information is recognized or considered important; it is coded and sent to STM (working memory); limited capacity and duration of around 12 seconds.
- **Long Term :** information is rehearsed or attended to is recorded and transferred into LTM; unlimited capacity and potentially unlimited duration

Within long term memory there are several other types of memory:
