Phil Simon, 2008-11-17 What does a Fortune 500 company implementing a multimillion-dollar off-the-shelf system have in common with a 150-person firm building its own system? In each case, the organization failed to activate and utilize its system as initially conceived by senior management. These two organizations are hardly alone. On the contrary, more than three in five new systems fail. Many miss their deadlines. Others exceed their initial budgets, often by ghastly amounts. system failure at three key points before during and after system implementations Why New Systems Fail provides such a framework with specific tools tips and questions from the perspective of a seasoned independent consultant with more than a decade of related experience The book examines in great detail the root causes of system failures Case studies examples and lessons from actual system implementations are presented in an informative straightforward and very readable manner More than a theoretical or technical text the book offers pragmatic advice for organizations both deploying new systems and maintaining existing ones
