## **The Last Titan:**

**The Last Titan** Jerome Loving, 2005-03-01 When Theodore Dreiser first published *Sister Carrie* in 1900 it was suppressed for its seamy plot colloquial language and immorality for as one reviewer put it its depiction of the godless side of American life It was a side of life experienced firsthand by Dreiser whose own circumstances often paralleled those of his characters in the turbulent turn of the century era of immigrants black lynchings ruthless industrialists violent labor movements and the New Woman This masterful critical biography the first on Dreiser in more than half a century is the only study to fully weave Dreiser's literary achievement into the context of his life Jerome Loving gives us a Dreiser for a new generation in a brilliant evocation of a writer who boldly swept away Victorian timidity to open the twentieth century in American literature Dreiser was a controversial figure in his time not only because of his literary efforts which included publication of the brutal and heartbreaking *An American Tragedy* in 1925 but also because of his personal life which featured numerous sexual liaisons included membership in the communist party merited a 180 page FBI file and ended in Hollywood The Last Titan paints a full portrait of the mature Dreiser between the two world wars through the roaring twenties the stock market crash and the Depression and describes his contact with important figures from Emma Goldman and H L Mencken to two presidents Roosevelt Tracing Dreiser's literary roots in Hawthorne Emerson Thoreau and especially Whitman Loving has written what will surely become the standard biography of one of America's best novelists *Titan Unveiled* Ralph Lorenz, Jacqueline Mitton, 2010-07-21 Reveals the startling new discoveries that have been made since the arrival of the Cassini Huygens mission to Saturn and Titan and offers readers a close up look at a world that could hold clues to the origins of life on Earth *Engineer Update*, 1986 *Achieving Accuracy* Marshall William McMurran, 2008-12-11 A Legacy of Computers and Missiles is an intensively researched photo enhanced discussion of digital computing and missile development in the Twentieth Century organized in two sections No matter what anyone has been told virtually all of the digital machines ever designed are binary deep down inside Number representations may have varied but the binary logic discussed here prevails After a bit of early history The Computing Section begins in earnest with Turing's Bombe used to decrypt Enigma traffic then investigates one by one digital systems from early room sized serial machines through the beginning of the modern parallel era ending with disgustingly parallel post 2000 Super computers Unlike most computing histories *Achieving Accuracy* deals in detail with military computing systems generally omitted for lack of definitive information Computer design and computer controlled missile guidance submarine navigation occupied some thirty years of the Author's professional career *Achieving Accuracy's* missile descriptions and discussions begin for weapon systems existing well before WW2 and cover virtually all US smart bombs cruise and ballistic missiles of that century Missile guidance systems have ranged from the V 1's dead reckoning through simple but jammable radio controlled to exceedingly complex self contained inertial guidance systems discussed at length The reader may be surprised to learn that a smart bomb flew in

1917 with several different models used in anger in WW2 The Minuteman III leg of the present Triad is described in detail along with a somewhat bizarre set of proposed basing plans for the Peacekeeper Missile that were precursors of the recently proposed Subway basing plan for MMIII Missile legacy includes a sub section necessarily less complete describing Soviet Russian missilery through 2000 noting that the early Soviet ballistic missile development was based almost entirely on the German V 2
