**Corrosion and Protection of Materials** Marina Cabrini,2021-04-06 This book contains thirty articles on various topics related to the corrosion and protection of metallic materials This topic is of strong actuality both due to the aging of plants and infrastructures that require checks and maintenance and to the use of traditional materials in increasingly aggressive environments added to the need of changing the current anti corrosion systems with less environmental impact methods Finally the new development of innovative materials such as additive manufacturing or high entropy alloys needs the characterization of their corrosion behavior In this issue there are works on new alloys obtained for additive manufacturing or high entropy on the study of corrosion and stress corrosion cracking and

hydrogen embrittlement mechanisms through electrochemical and microscopical techniques studies on low environmental impact inhibitors and biocides as well as ceramic and metal protective coatings Finally there are works on the study of the residual mechanical resistance of corroded infrastructures and on monitoring and non destructive control In this way the book therefore offers a somewhat varied panorama of research trends in the field      **Our Army** ,1946      Laser Welding
