The Beginning And The End:

Holy Quran's Judgement ? Part 2 M.S.M Abdullah (Rah),2013 The Spiritual Leader explains with copious evidence the views held by other religions too that the truth La Ilaha Illallah that being the lifeline of Tawheed and that there is no Ilah creation but Allah He has thrown a challenge to anyone who can disprove this truth offering a handsome reward Until now no one has come forward to take up his challenge Allah is an arbitrary name and it does not point to something static or stationery This name denotes something beyond time and space and the reach of human knowledge and has manifested as the whole universe If one becomes aware of this truth peace and tranquility will be eternal in his heart and mind

Ecology, behaviour and conservation of the charrs, genus *Salvelinus* Pierre Magnan, Céline Audet, Hélène Glémet, Michel Legault, Marco A. Rodríguez, Eric B. Taylor, 2002-07-31 *Salvelinus* species are one of the most thoroughly studied groups of fishes Many reasons explain this intense interest in charr biology Charrs have a Holarctic distribution encompassing many Asian North American and European countries and occupy diverse marine and freshwater environments Furthermore the current distribution of charr includes areas that were directly influenced by climate and topographic change associated with the many Pleistocene glaciations Undoubtedly these conditions have promoted much of the tremendous morphological ecological and genetic variability and plasticity within *Salvelinus* species and they make charr very good models to study evolutionary processes in action Many charr species also exhibit demographic characteristics such as slow growth late maturity and life in extreme environments that may increase their susceptibility to extinction from habitat changes and overexploitation especially in depauperate aquatic habitats This vulnerability makes understanding their biology of great relevance to biodiversity and conservation Finally charr are of great cultural commercial and recreational significance to many communities and their intimate linkage with human societies has stimulated much interest in this enigmatic genus This volume comprises a selection of papers presented at the fourth International Charr Symposium held in Trois Rivières Québec Canada from 26 June to 1 July 2000 It includes 31 papers on ecological interactions and behaviour trophic polymorphism movement and migration ecophysiology and evolutionary genetics ecological parasitology environmental stress and conservation These studies cannot cover all recent developments in the ecology behaviour and conservation of *Salvelinus* species but collecting them into a special volume should bring attention to current research on this important genus and stimulate further work on *Salvelinus* species

Absolute Reality in the Qur'an Masudul Alam Choudhury, 2016-09-14 This book studies the absolute reality of the Qur'an which is signified by the struggle of truth against falsehood in the framework of monotheistic unity of knowledge and the unified world system induced by the consilience of knowledge In such a framework the absolute reality reveals itself not by religious dogmatism Rather the methodology precisely comprises its distinctive parts These are namely the primal ontology as the foundational explained axiom of monotheistic unity the secondary ontologies as explanatory replications of the law of unity in the

particulars of the world system epistemology as the operational model and phenomenology as the structural nature of events induced by the monotheistic law that is by knowledge emanating from the law The imminent methodology remains the unique explanatory reference of all events that take place advance and change in continuity across continuums of knowledge space and time
