div when building your first bike is to have more confidence in yourself. That may be some of the best advice that beginner motorcycle guys would be given. How many of them build more bikes? Not very. Build it out there is a dud and many of them come from completely different backgrounds and environments. Custom motorcycle builders have a different skillset. Just like an amateur musician, a custom bike builder tends to have their own weird things. On the other hand, for most of them, they started making it when they had a need. If you have a need to build your own custom bike, which is not the common custom bike, you need the right tools for you to work on and build your own custom motorcycle. Builders have their hobbies other than just riding. One of the best would be building a motorcycle. That's the thing, the amount of satisfaction and gratification when you assembled something that came in pieces into your bike. You don't have to find it if you don't have discipline and a need to work through all the challenges and frustration to move with the end result. God knows I bet you don't feel happy when the bike finally builds with its details.
