**Education in Perspective** Earle Taylor, 2000 This book focuses on Namibia's education since independence. The book is developed around 40 articles reflecting the rich cross section and multi cultural diversity of interests, opinions, values, expectations and perspectives and is held together by a common thread of a shared national vision for Namibia that knits freedom, peace, unity, equity and progress into every economic activity for the sustained well being of all Namibians.

**Proceedings of a Workshop on the Management of Science and Technology in Namibia**, 1996 **Annex (i)** Namibia. Presidential Commission on Education, Culture and Training, 2001 Tropical Forest Ecology Florencia Montagnini, Carl F. Jordan, 2005-12-12 Research in tropical forestry is confronted with the task of finding strategies to alleviate pressure on remaining forests and techniques to enhance forest regeneration and restore abandoned lands using productive alternatives that can be attractive to local human populations. In addition, sustainable forestry in tropical countries must be supported by adequate policies to promote and maintain specific activities at local and regional scales. Here a multi disciplinary approach is presented to better the understanding of tropical forest ecology as a necessary step in developing adequate strategies for conservation and management. The authors have long experience in both academic and practical matters related to tropical forest ecology and management. Fulbright Scholar Program, Grants for Faculty and Professionals, 2004 **Critical Adult Education in Food Movements** Colin R. Anderson, Rosa Binimelis Adell, Michel P.

Pimbert, Marta Rivera Ferre, 2022-11-21 This book focuses on research that shows the importance of critical adult education for the spread of food sovereignty and agroecology to more people and places. It pays particular attention to the important role that learning, education and pedagogy can play in social transformation for food sovereignty and justice, an approach referred to broadly as Learning for Transformation. It reveals common dynamics and principles that critical education for food sovereignty share in different contexts. The book draws together 8 chapters that offer new critical insights about why, where and how learning for transformation is being implemented and what next. Previously published in Agriculture and Human Values Volume 36 issue 3 September 2019 Chapter Transformative agroecology learning in Europe building consciousness, skills and collective capacity for food sovereignty is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com)

**Water and Development - Volume II** Catherine M. Marquette, 2009-08-10 Water and Development is a component of Encyclopedia of Water Sciences, Engineering and Technology Resources in the global Encyclopedia of Life Support Systems (EOLSS) which is an integrated compendium of twenty one Encyclopedias. Water is perhaps the most critical natural resource upon which humans depend. Agricultural and food production, trade and ultimately the economic development of all regions of the world depend on rivers, streams, dams, oceans and other water resources. This critical relationship has persisted through the agricultural and industrial revolution and into the era of economic globalization. The relationship between human activity and the water resources on which it

depends also continues to be reciprocal Human consumption energy agricultural industrial and other economic activity have significant impacts on water quality and quantity for better or worse A key element of sustainable development rests on our global capacity to interact with the water resources on which we depend in ways that preserve them for our use and that of future generations The two volumes on the subject present some of the topics such as Water Agriculture and Food Interactions dams water valuation arid regions water management and Conflict over Water Resources Water and Sustainable Development They consider the implications which contributions have in each of these areas as well as introduce additional issues relating to the future of dams innovative ways of increasing water supply transboundary water resources and the implications of global climate change for water resources These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts Managers and Decision makers and NGOs Guide to Programs of Geography in the United States and Canada ,2008
