

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

[illegible]

where λ is the eigenvalue and \mathbf{v} is the eigenvector. The eigenvectors are normalized such that $\mathbf{v}^T \mathbf{v} = 1$. The eigenvectors are ordered by decreasing eigenvalue. The first eigenvector is the principal component. The principal component is the linear combination of the original variables that accounts for the maximum variance in the data. The principal component is the first eigenvector of the covariance matrix of the data. The principal component is the first eigenvector of the covariance matrix of the data. The principal component is the first eigenvector of the covariance matrix of the data.

Introductory Statistics for the Behavioral Sciences

Joan Welkowitz, Barry H. Cohen, Robert B. Ewen, 2010-06-08 A comprehensive and user friendly introduction to statistics now revised and updated Introductory Statistics for the Behavioral Sciences has had a long and successful history and is a popular and well respected statistics text Now in its sixth edition the text has been thoroughly revised to present all the topics students in the behavioral sciences need in a uniquely accessible format that aids in the comprehension and implementation of the statistical analyses most commonly used in the behavioral sciences Using a continuous narrative that explains statistics and tracks a common data set throughout the authors have developed an innovative approach that makes the material unthreatening and memorable providing a framework that connects all of the topics in the text and allows for easy comparison of different statistical analyses New features in this Sixth Edition include Different aspects of a common data set are used to illustrate the various statistical methods throughout the text with an emphasis on drawing connections between seemingly disparate statistical procedures and formulas Computer exercises based on the same large data set and relevant to that chapter's content The data set can be analyzed by any available statistical software New Bridge to SPSS sections at the end of each chapter explain for those using this very popular statistical package how to perform that chapter's statistical procedures by computer and how to translate the output from SPSS New chapters on multiple comparisons and repeated measures ANOVA
