**#MeToo and Beyond** M. Cristina Alcalde,Paula-Irene Villa,2022-07-26 NiUnaMenos Aufschrei LoSHA Before MeToo became a massive global movement these were the hashtags that represented activists from Ukraine to Peru who demanded accountability for the sexual violence and racism xenophobia and misogyny inflicted on women transgender people and girls Led by activists such as Tarana Burke who popularized the phrase me too these movements provided a call to action for survivors across the world to speak out about their experiences In MeToo and Beyond M Cristina Alcalde and Paula Irene Villa bring together scholars and activists from various backgrounds to approach MeToo from multiple spaces positionalities and areas of expertise many from regions and contexts often overlooked and understudied in the mediascapes of the global North This volume includes perspectives from around the world and touches on diverse topics spanning masculinity studies transgender people s heightened risk of suffering sexual harassment and violence the internal conflict in American Jewish communities as activists began speaking out against prominent members who relied on shared cultural values to shame their victims as well as many other significant aspects of the first all inclusive international effort to end gender based violence The editors and contributors heed Burke s call to amplify marginalized voices so that instead of becoming footnotes these voices guide activists to frame polyphony as central to understanding past current and future forms of gender based violence and resistance The goal of MeToo and Beyond is to examine both

profoundly universal and specific experiences of sexual violence as well as the collective effort to stop gender based violence wherever it occurs Activists and scholars will find this book an important and necessary contribution to current and future discussions on sexual violence and global movements **The Saturday Review of Politics, Literature, Science and Art**

of our world today     The Economic Rise of China Zhihua Wang, Eleftherios Giovanis, Nikolaos Karagiannis, 2022-08-08 This book seeks to reinvigorate debates on the growing forces influencing China's social and economic evolution. It draws attention to several neglected areas in the discussion of China's rapid economic expansion such as unbalanced growth, mass internal migration, international labour flows, and disparities in access to education, public health, and housing. China's rapid economic development has attracted the interest of many scholars following its emergence as the world's second largest economy and stimulated research into the underlying factors that have made this development unique. In advancing research, the chapters included in this edited book help with refining our understanding of the forces that have been driving China's social, economic, political, institutional, and technological developments, addressing the related issues, thus advancing the social, economic literature within the China context. This book serves the interests of scholars who seek to understand more fully the development of China as well as of other emerging economies. One of the chapters in this volume was originally published in the *Review of Evolutionary Political Economy*. Other chapters were originally published in the *Forum for Social Economics*.

**Medicines Management in Mental Health Nursing** Stan Mutsatsa, 2016-12-07 Medicines are a crucial part of the jigsaw when considering how to provide recovery focussed care in mental health. It is important that mental health nurses understand how psychiatric drugs work, what the common treatments are, and appreciate the ethical and legal dimensions that affect how medicines can and should be used in mental health care. Using innovative activities and real life case studies, this book has been carefully designed to provide all this and more, making it the ideal resource to build knowledge and confidence in this crucial area of practice. Key features: Clear explanations of both the underlying biology and pharmacology as well as the wider practicalities of working with medicines. Provides accessible information on the most common conditions and treatments. Linked to the NMC standards and essential skills clusters. Activities and case studies help students to apply what they have learnt to practice and consider the full impact that medicines will have on service users.     The Mining Journal, Railway and Commercial Gazette, 1891     Belief, Behavior, and Health Sandra D. Lane, 2024-10-03 This book uniquely examines across cultures the health benefits and detriments of religious beliefs with important implications for individual wellbeing and human survival. *Belief, Behavior, and Health* takes the reader through journeys of the author's research in the Middle East, Africa, and the urban United States where she focused on the unequal health and survival of women globally and vulnerable groups in the United States. Almost every health problem, especially those experienced by the poor and disadvantaged, arose from or was made worse by the conditions in the environment in which people lived. Lane's detailed studies of beliefs about Judaism, Christianity, and Islam led to the author's deep observations on how religious belief and practice, as well as discrimination due to religious prejudice, can be a major influence on health, both positively and negatively. In this book, Lane shows how religious precepts and cultural influences on religious behavior function as social determinants of health. An accessible and compelling read, this book will appeal to students and scholars of public health.

**Owning a Body + Moving a Body = Me?** Lorenzo Pia,Francesca Garbarini,Andreas Kalckert,Hong Yu Wong,2019-05-16 The conscious experience of the bodily self is a cornerstone of human nature which allows us to delineate the boundaries between the surrounding environment and us A plethora of clinical and experimental investigations has clearly demonstrated that bodily self consciousness draws on different neuro cognitive mechanisms with distinct anatomo functional underpinnings Among these the sense of body ownership i e my body belongs to me and the sense of agency i e I am the author of my actions have attracted increasing interest in recent years The former seems to be strongly rooted in afferent sensory signals whereas the latter appears to be rooted in efferent motor signals and or the monitoring of their sensory consequences Despite the consensus that the interplay between body ownership and the sense of agency contribute to the omnipresent conscious experience of the bodily self the character and the form of this relationship remain unclear Though research into the mechanisms underlying ownership e g bodily illusions or on agency e g intentional binding is blooming very few studies have aimed to investigate both these processes at the same time Therefore many questions remain unresolved for example how do the experiences of ownership and agency influence each other What are the anatomo functional substrates of their interplay and how does damage to these structures affect the experience of either ownership or agency or both in clinical populations What is the specific role of efferent and afferent signals and how may these be complimented by other inputs like emotional or interoceptive cues And going beyond the mechanisms and anatomo functional substrates are there rational relations between the representations underlying body ownership and agency so that ownership can be seen as a condition on intentional action and a sense of agency Elucidating the complex relationship between ownership and agency is a crucial step in our understanding of bodily self consciousness and may help us to better understand the variety of neurological psychiatric disorders affecting the perception of one s own body and its movements These insights can contribute to the development of future prosthetic devices or virtual reality applications which may in turn allow for new approaches in neuroscience rehabilitative medicine and therapeutic interventions *Scientific American* ,1875 Monthly magazine devoted to topics of general scientific interest
