**Guide to Service Subcontract Terms and Conditions** American Bar Association. Strategic Alliances, Teaming, and Subcontracting Committee, Aileen F. Heim, 2008      *Services for people with neurological conditions* Great Britain: National Audit Office, 2011-12-16 Since 2005 when the Department of Health introduced its National Service Framework for Long term Conditions people with neurological conditions have had better access to health services but key indicators of quality such as the rate of emergency hospital readmissions have worsened The Department does not know what the Framework and additional spending of nearly 40 per cent over four years have achieved The Framework was designed to improve care for people with neurological conditions but progress in implementing it has been poor Access to health services for people with long term neurological conditions such as Parkinson s disease multiple sclerosis and motor neurone disease has improved and waiting times for inpatient and outpatient neurology have decreased since 2007 The number of elective neurological operations performed has also increased However the rate of emergency admissions to hospital has increased significantly and there is large variation in emergency admission rates between Primary Care Trusts Access to services for patients also varies significantly depending on where they live Many patients following their diagnosis are not given information on their condition about local services or on available support Ongoing care is fragmented and poorly coordinated and there is a pattern of patients being referred to hospital for treatment then discharged and then referred to hospital again The NAO also found that there is poor coordination between health and social services The number of adults with a physical disability receiving social services has fallen since 2005 06 because fewer people are now eligible for these services      **Services for people with neurological conditions** Great Britain: Parliament: House of Commons: Committee of Public Accounts, Margaret Hodge, 2012-03-16 Approximately two million people in the United Kingdom have a neurological condition including Parkinson s disease motor neurone disease or multiple sclerosis But individual care is often poorly coordinated and the quality of services received depends on where you live Some areas simply don t have enough expertise both in hospitals and the community In 2005 the Department for Health launched a new Framework to provide services for people with a neurological condition There have been some improvements such as a reduction in waiting times But unlike the strategies for Cancer and Stroke the model used to implement the Framework hasn t worked For this clinical area the Department left the implementation to local health commissioners but gave them no leadership at all and set no clear targets It set no baselines and failed to monitor progress and so could not hold them to account where things went wrong The present Government needs to understand what went wrong here for the future Health spending on neurological conditions increased by nearly 40 per cent in three years Over much the same period emergency admissions have risen by 32 per cent and readmissions to hospital within 28 days have increased from 11.2 per cent to 14 per cent The Department is moving towards a decentralised health and social care landscape In doing so it must set clear objectives for joint health and social care outcomes and

services for people with neurological conditions      Social Work With Older People: Approaches To Person-Centred Practice Hall, Barbara, Scragg, Terry, 2012-03-01 This text fills a gap for an accessible textbook which takes a person centred approach to working with older people by providing readers with a basic knowledge of policy legislation theory and research

HC 502 - Services to People with Neurological Conditions: Progress Review Great Britain. Parliament. House of Commons. Committee of Public Accounts, 2016 Over 4 million people in England have a neurological condition Services for people with these conditions are not consistently good enough and there remains wide variation across the country in access outcomes and patient experience As well as affecting patients poor care has implications for the NHS for example it costs 70 million to deal with emergency admissions of epilepsy patients and many of these admissions are likely to result from shortcomings in care Neurological services remain poorly integrated with a lack of joint commissioning of health and social care Over 40% of people with a neurological condition do not think that local services work well together and only 12% of people have a written care plan to help coordinate their care There has been some progress in implementing the recommendations that the previous Committee made in 2012 including the appointment of a national clinical director for adult neurology and some improvements in data However these changes have not yet led to demonstrable improvements in services and outcomes for patients It is clear that neurological conditions are not a priority for the Department of Health and NHS England and we are concerned that the progress that has been made may not be sustained We therefore intend to review the position again later in this Parliament      *Managing Long-term Conditions and Chronic Illness in Primary Care* Judith Carrier, 2015-06-29 Effective management of long term conditions is an essential part of contemporary nursing policy and practice Systematic and evidence based care which takes account of the expert patient and reduces unnecessary hospital admissions is vital to support those with long term conditions chronic diseases and those who care for them Reflecting recent changes in treatment the nurse's role and the patient journey and including additional content on rehabilitation palliative care and non medical prescribing this fully updated new edition highlights the key issues in managing long term conditions It provides a practical and accessible guide for nurses and allied health professionals in the primary care environment and covers the physical and psychosocial impact of long term conditions effective case management self management and the expert patient behavioural change strategies and motivational counselling telehealth and information technology nutritional and medication management Packed with helpful clearly written information *Managing Long term Conditions and Chronic Illness in Primary Care* includes case studies fact boxes and pointers for practice It is ideal reading for pre and post registration nursing students taking modules on long term conditions and will be a valuable companion for pre registration students on community placements      Exercise Management for Referred Medical Conditions Andrew Scott, David Broom, 2022-07-29 Exercise referral describes the process of consultation planning and instructing physical activity programmes and applying appropriate behaviour change strategies for clients presenting a range of low to medium risk

medical conditions Exercise Management for Referred Medical Conditions is the first book to integrate exercise prescription with the development of healthy behaviours and the promotion of physical activity and well being and provides students with an evidence based applied guide to becoming effective exercise referral practitioners The book draws upon the latest research and recommends best practices for creating referral pathways providing exercise programmes and engaging clients in health lifestyles Covering the pathology medical management role of exercise and recommendations for programming in each case it discusses a range of conditions including Obesity and type I and II diabetes Hypertension and dyslipidaemia Asthma Low back pain osteoarthritis and joint replacement rheumatoid arthritis and osteoporosis Depression anxiety and stress disorders Consistently organised and laden with pedagogical features including learning objectives key terms case studies future developments and chapter summaries no other book offers such a clear holistic model for exercise referral This is a vital resource for any student undertaking vocational courses in exercise referral and an important reference for exercise scientists physical therapists fitness professionals or local policy makers interested in the use of physical activity in healthcare

**Care, Our Say** Great Britain: Department of Health,2006-01-30 This White Paper sets out the Government s proposals to  
 reform and expand community health and social care services in order to meet local needs especially in poorer deprived  
 communities Four key objectives are highlighted in the White Paper better health prevention services with earlier  
 intervention increased patient choice tackling inequalities and improving access to community services and increased  
 support for people with long term needs to live independently Specific measures include expansion of local care settings  
 outside hospitals increased joint commissioning between PCTs and local authorities to improve service integration the  
 introduction of practice based commissioning where GPs are given more responsibility for local health budgets increased  
 provision for new primary care providers to compete for PCT contracts and the introduction of a new NHS Life Check to  
 promote healthier lifestyles with a pilot scheme in spearhead PCTs by 2007 08 **Regulating Audiovisual Services**  
 Thomas Gibbons,2023-07-14 In recent years the changing nature of audiovisual services has had a significant impact on  
 regulatory policy and practice The adoption of digital technology means that broadcasting cable satellite the Internet and  
 mobile telephony are converging enabling each of them to deliver the same kinds of content and allowing users to exercise  
 much greater choice over the kind of material that they receive and when they receive it The essays examine the implications  
 for regulatory design asking whether there is still a role for traditional style state controls or whether other techniques such  
 as competition in the market and self regulation are more appropriate They also explore how in the digital era structural  
 issues of media ownership and control become problems of access and interconnection between services and how content  
 regulation focuses more on problems raised by the interactions between providers and users the relationship between  
 freedom of information and technologies to control it and the international reach of the new media **Federal Register**
