Field Manuals United States. War Department,1980 **Are Low-Skill Women Being Left Behind? Labor Market Evidence from the UK** Ms. Era Dabla-Norris,Carlo Pizzinelli,Jay Rappaport,2022-02-25 Labor markets in the UK have been characterized by markedly widening wage inequality for lowskill non college women a trend that predates the pandemic We examine the contribution of job polarization to this trend by estimating age period and cohort effects for the likelihood of employment in different occupations and the wages earned therein over 2001 2019 For recent generations of women cohort effects indicate a higher likelihood of employment in low paying manual jobs relative to high paying abstract jobs However cohort effects also underpin falling wages for post 1980 cohorts across all occupations We find that falling returns to labor rather than job polarization has been a key driver of rising inter age wage inequality among low skill females Wage level cohort effects underpin a nearly 10 percent fall in expected lifetime earnings for low skill women born in 1990 relative to those born in 1970 **Tasks, Skills, and Institutions** Carlos Gradín,Piotr Lewandowski,Simone Schotte,Kunal Sen,2023-06-22 This is an open access title available under the terms of a CC BY NC SA 3 0 IGO licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations The book investigates the trends in earnings inequalities in developing countries to determine the main drivers Particular attention is paid to extending the most conventional explanations of changes in earnings inequality based on the relative abundance of skilled and unskilled labour with recent theories that put the nature of tasks performed by workers in their jobs rather than their skills at the centre of the analysis The latter approach has helped to explain relevant patterns recently observed in the trends in earnings inequality in the US and other industrialized countries Developed countries have experienced a polarization in earnings and in employment namely stronger growth in the earnings and jobs for the most and least skilled workers at the expense of those in the middle This pattern has been attributed to differences in tasks whether a given job is routine and can be automated or offshored rather than skills and has reduced employment and incomes in typical middle class jobs in manufacturing and services However this narrative has been developed in the context of mature industrialized economies on the frontier of technological change that have also seen a large set of activities offshored to emergent economies Evidence for developing countries however is still scarce and faces bigger challenges both conceptual and in terms of gathering the necessary data on earnings and task content of jobs This book presents the main results of the UNU WIDER project The Changing Nature of Work and Inequality aiming to fill this knowledge gap **Handbooks** Defense Documentation Center (U.S.),1962 *Artificial Intelligence and the Future of Work: Humans in Control* Ekkehard Ernst,Janine Berg, Phoebe V. Moore,2024-10-01 Artificial Intelligence AI is rapidly advancing in areas such as pattern detection classification and prediction which were long thought to be the exclusive realm of humans These developments are triggering excitement about the potential of AI but are also raising concerns about possible risks The versatility of AI and its

speed of development have led to a wide range of applications both in personal and professional environments The most dramatic effects are however in the world of work AI is impacting job loss and employability and causing a transformation of tasks in a range of occupations and sectors It is also affecting other aspects of the labor market such as recruitment performance monitoring and dismissal As such the development and implementation of AI are raising concerns about the future of work both in terms of its mere existence and quality with critical implications for the social fabric as well as future development prospects
