Melanie Walker, Monica McLean, 2022-07-15 This book explores learning outcomes for low income rural and township youth at five South African universities The book is framed as a contribution to southern and Africa-centred scholarship adapting Amartya Sen's capability approach and a framework of key concepts capabilities functionings context conversion factors poverty and agency to investigate opportunities and obstacles to achieved student outcomes This approach allows a reimagining of inclusive learning outcomes to encompass the multi-dimensional value of a university education and a plurality of valued cognitive and non-cognitive outcomes for students from low income backgrounds whose experiences are strongly shaped by hardship Based on capability theorising and student voices the book proposes for policy and practice a set of contextual higher education capability domains and corresponding functionings orientated to more justice and more equality for each person to have the opportunities to be and to do what they have reason to value The book concludes that sufficient material resources are necessary to get into university and flourish while there the benefits of a university education should be rich and multi-dimensional so that they can result in functionings in all areas of life as well as work and future study the inequalities and exclusion of the labour market and pathways to further study must be addressed by wider economic and social policies for inclusive learning outcomes to be meaningful and that universities ought to be doing more to enable black working class students to participate and succeed Low Income Students Human Development and Higher Education in South Africa makes an original contribution to capability scholarship conceptually in theorising a South-based multi-dimensional student well-being higher education matrix and a rich reconceptualisation of learning outcomes as well as empirically by conducting rigorous longitudinal in-depth mixed methods research on students' lives and experiences in

higher education in South Africa The audience for the book includes higher education researchers international
capabilitarian scholars practitioners and policy makers **Going to University** Case, Jennifer, Marshall, Delia, 2018-02-09
Around the world more young people than ever before are attending university Student numbers in South Africa have
doubled since democracy and for many families higher education is a route to a better future for their children But alongside
the overwhelming demand for higher education questions about its purposes have intensified Deliberations about the
curriculum culture and costing of public higher education abound from student activists academics parents civil society and
policy makers We know from macro research that South African graduates generally have good employment prospects But
little is known at a detailed level about how young people actually make use of their university experiences to craft their life
courses And even less is known about what happens to those who drop out This accessible book brings together the rich life
stories of 73 young people six years after they began their university studies It traces how going to university influences not
only their employment options but also nurtures the agency needed to chart their own way and to engage critically with the
world around them The book offers deep insights into the ways in which public higher education is both a private and public
good and it provides significant conclusions pertinent to anyone who works in and cares about universities
