Educating Tomorrow Angela Thody,2000 It is well accepted that education needs to be equalised along gender lines However until the management of education is also gender sensitive that content cannot expect to be effectively communicated This is the premise of this groundbreaking book It addresses gender issues and management practices in education by critically examining both successes and failures drawn from a number of African countries It proposes ways of improving the management of education to focus on women who have hitherto been left out of the mainstream of educational and training practices It throws a uniquely African light on an issue that goes to the heart of the process of democratisation In order to empower the girl child in the new South Africa and in

Africa the patriarchal and parochial structures that exist within the African educational paradigm need to be broken down and replaced This would address problems such as why women are discouraged from certain fields of studies like sciences the effect that interactions in learning situations can have on the achievement and attainment of female students and the critical necessity of educating and training girls in rural Africa The book speaks to the heart of the administrative processes within the education framework and shows how the way classes are structured or materials selected needs to be adapted in order to correct the present imbalance It was created and developed with the aim of seeking out the best education management practices finding common analyses from these and using them to develop guidelines for future education management
