**What Can We Know?** Louis P. Pojman, 2001 Compact yet more comprehensive than similar texts WHAT CAN WE KNOW analyzes the central topics of truth justification ranging from skepticism to religious belief Written in the author's friendly and conversational style without unnecessary jargon the text makes the subject matter more accessible and inviting to students

**Relativism** Francis J. Beckwith, Gregory Kousser, 1998-10 A critique of moral relativism the belief that there exists no objective moral standards that apply to every place person and time

**The Beauty of the Faith** Joseph D. Wooddell, 2010-09-23 Nearly everyone finds beauty compelling so Christian apologists should devise ways to present an aesthetic Christian apologetic Nearly all apologists admit that the beauty of a life well lived and the beauty of the Christian community along with the use of media and the arts are not only helpful for apologetics but essential in a postmodern culture In fact it is frustrating to see how many apologists mention the need for such an approach but go on devoting most of their energies to traditional approaches This book is different It clearly shows the pros and cons of traditional approaches and offers a fresh perspective as well arguing that beauty is the most compelling apologetic and suggesting ways to implement such an approach It demonstrates how Western culture arrived in its current unfortunate situation and uses both Scripture and figures like Athenagoras and Jonathan Edwards to challenge current views on apologetics

**Knowing God as an Evangelical** Dan-Adrian Petre, 2023-04-26 In the present polyphony of evangelical theological epistemology there are several authoritative approaches Yet the evangelical emphasis on sola scriptura demands that theological epistemology be subjected to the biblical canon In this book Dan Adrian Petre argues for a canonically derived theological epistemological framework that may foster a fuller understanding of theological knowledge formation within evangelicalism Specifically he explores some representative evangelical voices to identify the reasons for the contemporary epistemological variance Petre then uses a canonical epistemological methodology to outline a biblically based framework In exploring how the Scripture conceptualizes the formation of theological knowledge the book uses cognitive linguistics to grasp the conceptual meaning of the theological knowledge formation in the Bible using prototypical case studies The resulting epistemological implications outline a minimal epistemological model derived from the biblical canon Using this vantage point the author assesses the contemporary evangelical epistemological dissonance as a means of indicating a way forward for a canonical epistemological attunement

**How Do We Know?** James K. Dew, Mark W. Foreman, James K. Dew Jr., 2020-11-17 What does it mean to know something Epistemology the study of knowledge can often seem like a daunting subject And yet few topics are more basic to human life In this primer on epistemology now in a second edition James Dew and Mark Foreman provide an

accessible entry into one of the most important disciplines within contemporary philosophy     Insanity Jonah Haddad,2013-11-01 Have you seen such men peculiar raving foam mouthed and straitjacketed throwing themselves mercilessly at white padded walls Such men are said to be insane But there is more to insanity than the images depicted in film and planted in our minds by popular media Insanity is a condition that affects us all Unsoundness of mind disrupts our ability to think clearly and to form knowledge about the world Our understanding is dangerously incomplete and our minds are corrupt We are all insane How then can we ever hope to know our world Is it possible to form justified true beliefs about anything What possibility if any do we have of escaping this condition of madness that keeps us from the light of knowledge In Insanity Jonah Haddad explores these very questions by introducing the main problems of the theory of knowledge and by offering a response to our madness a response grounded in God the ultimate Knower     Locke's Twilight of Probability Mark Boespflug,2022-10-26 This book provides a systematic treatment of Locke s theory of probable assent and shows how the theory applies to Locke s philosophy of science moral epistemology and religious epistemology There is a powerful case to be made that the most important dimension of Locke s philosophy is his theory of rational probable assent rather than his theory of knowledge According to Locke we largely live our lives in the twilight of probability rather than in the sunshine of certain knowledge Locke s theory of probable assent has far reaching significance insofar as it contains a wealth of novel independently interesting and prescient elements that precede the modern field of formal epistemology In this book the author argues for the central role of probable assent in Locke s philosophy Locke s theory of probable assent is based on an epistemic modesty that claims roughly that our cognitive abilities are limited and that we ought to carry ourselves in believing with due caution This modesty motivates the author s discussion of other aspects of Locke s epistemology notably his principle of proportionality his doxastic involuntarism his epistemological pragmatism and his theory of testimony The book concludes by connecting the theory of probable assent with Locke s views on the limits of science moral epistemology and the rationality of faith Locke s Twilight of Probability will appeal to scholars and advanced students working on Locke and the history of early modern philosophy     **Preaching Christ in a Postmodern Culture** K. A. Beville,2010-04-16 Starting with some observations relating to shifts in ecclesiology and identifying them as a move beyond contextualization to syncretism this work goes on to assess the feasibility of preaching in a postmodern culture which rejects both the idea of absolute truth and authority used as power It traces the historical and philosophical development of postmodernism The Enlightenment project is deemed to have failed and Christianity is perceived as an oppressive metanarrative In a world that is becoming increasingly sceptical and where preaching practitioners are becoming disillusioned this book offers some guidelines about preaching to postmoderns In a relational age rationality is impotent but the author distinguishes between authoritative and authoritarian preaching allowing hope for the survival of the homiletic task Humility is presented as preferable to certitude and persuasion is redefined The author suggests using an inductive mode of communication as a

means of engaging postmodern listeners He signposts a way forward in the labyrinthine complexity of the new paradigm and demonstrates that the homiletic task is still feasible Thus this book will be of interest to teachers and students of theology as well as pastors desiring to develop a new apologetic strategy **Who's Afraid of the Unmoved Mover?** Andrew I.

Shepardson,2019-02-12 Are postmodern philosophy and Christian theology compatible A surprising number of Christian philosophers and theologians think so However these same thinkers argue that postmodern insights entail the rejection of natural theology the ability to discover knowledge about the existence and nature of God in the natural world Postmodernism they claim shows that appealing to nature to demonstrate or infer the existence of God is foolish because these appeals rely on modernity's outmoded grounds for knowledge Moreover natural theology and apologetics are often hindrances to authentic Christian faith Notions like objectivity and rationality are forms of idolatry from which Christians should repent This book carefully examines the nature of truth rationality general revelation and evangelism to show that the postmodern objections fail and that Christians ought to lovingly and faithfully use natural theology and apologetics to defend and commend the Christian faith to a world in need of the knowledge of God **The Faustus Myth in the English Novel**

Şeyda Sivrioğlu,2017-06-23 The Faustus myth before being identified as a myth was the folktale of a man named Faustus who lived in Germany Underneath the popularity of this myth lies the basic human instinct to trespass the limits of traditional knowledge in pursuit of self definition authentic knowledge and power This search and transgression also involve the desire to exercise the right of making free authentic choices Faustus represents universal issues that are relevant for all human beings which explains the reason why he has acquired mythic stature Indeed a most persistent myth has evolved the appeal of which has led one writer after the other to reshape it After his story became popular he reappeared even in contemporary culture in different art forms such as literature both high brow and popular including comics the ballet and the opera The real historical Faustus came onto the scene as a scholar and persistently reappeared in literature assuming different identities which however shared basically the same qualities This book demonstrates and offers different perspectives to versions of the Faustus myth in literature Christopher Marlowe's *The Tragical History of the Life and Death of Doctor Faustus* Goethe's *Faust* and John Fowles' *The Magus* The Faustus Myth is a cycle which starts and ends in tragic circumstances in Christopher Marlowe's Renaissance Faustus in salvation in Johann Wolfgang von Goethe's *Faust* and in meaninglessness ambiguous collapses in John Fowles' existentialist *Nicholas Urfe* *Hermeneutics as Epistemology* William C. Roach,2015-07-24 Historic Protestantism and evangelicalism has always been committed to the authority of Scripture and interested in the proper interpretation of the Bible They uphold the motto As Scripture says God says and as God says Scripture says Many today claim this type of reasoning is faulty since individuals can no longer know the true meaning of Scripture because there are no stable metaphysical or epistemological frameworks Moreover they claim that approaches such as the one presented by Carl F H Henry no longer provide adequate grounds to address the pressing hermeneutical

issues This study responds to these types of claims showing each of these proposals is based upon faulty first principles or misrepresentations This book surveys hermeneutical innovations and Henry's epistemological hermeneutic to show that Henry's epistemology is foundational to his hermeneutic offering present day evangelicals an epistemologically justified approach to hermeneutics as epistemology and methodology The book will be of importance to those with interest in evangelical hermeneutics or philosophical hermeneutics in general It provides a clear assessment of the impact of Carl F H Henry's epistemology and hermeneutic and strives to respond to criticisms raised against his Augustinian Reformed revelational cognitive propositional hermeneutic

**Sun Tzu and the Rise of China** Southern Jameson West, 2020-12-30

Herein the writer discusses the present rise of China from looking at a specific critical statement made by Sun Tzu in his ancient treatise The Art of War The writer builds on this one particular quote in such a way as to obtain a synthesis for why Mainland China needs so desperately to bring back Taiwan back into the fold Mainland China has for decades claimed that Taiwan is a renegade province and nothing more Mainland China hopes and works desperately on a round the clock daily basis in order to try to convince the rest of the world that this in fact is the case Because of the mainland's unceasing rhetoric often the rest of the world isn't aware of the true state of affairs as on the contrary all Chinese in the world are that in fact Taiwan because of its democratic and open society it therefore is an absolute threat to the state security of mainland China In fact many of Taiwan's open policies date back to the Japanese control of Taiwan from the years of 1895 until the end of WWII This fact is something that mainland China refuses to officially accept and will without hesitation vehemently deny However everyone who knows even some history and has travelled to Taiwan and spent time there can easily figure out The writer has seen it for himself Systemics and reductionism are discussed as part of the analytical framework of this synthesis using Sun Tzu's theory as per several noted writers on the theories of International Relations Mention will be made of how this present mainland policy has in fact seriously eroded the once very sound infrastructure that was once the fundamental social fabric and framework for Hong Kong leaving many Hong Kong people in serious doubt for their future Ultimately all of this gets put on the front door of the U S A whose position in the world is by this very policy further under an even greater threat Can China out flank the USA in places such as the Pacific and continents such as Africa The outcome remains to be seen But this book will try to consider many of the possible scenarios Notwithstanding what also gets mentioned is the concept of Entropy in trying to analyze international political activity Certain concepts such as the entropy of mixing are used to speculate that historical events cannot easily be stopped once political momentum and policies are put into place The power of the coalition in game theory

A Theory of Immediate Awareness M. Estep, 2013-06-29 This book is multi and interdisciplinary in both scope and content It draws upon philosophy the neurosciences psychology computer science and engineering in efforts to resolve fundamental issues about the nature of immediate awareness Approximately the first half of

the book is addressed to historical approaches to the question whether or not there is such a thing as immediate awareness and if so what it might be This involves reviewing arguments that one way or another have been offered as answers to the question or ways of avoiding it It also includes detailed discussions of some complex questions about the part immediate awareness plays in our over all natural intelligence The second half of the book addresses intricate and complex issues involved in the computability of immediate awareness as it is found in simple ordinary things human beings know how to do as well as in some highly extraordinary things some know how to do Over the past 2 500 years human culture has discovered created and built very powerful tools for recognizing classifying and utilizing patterns found in the natural world The most powerful of those tools is mathematics the language of nature The natural phenomenon of human knowing of natural intelligence generally is a very richly textured set of patterns that are highly complex dynamic self organizing and adaptive

**Revitalizing Theological Epistemology** Steven B Sherman,2010-03-25 In Revitalizing Theological Epistemology Steven B Sherman addresses questions about what evangelical theology ought to be doing in light of the changing cultural situation He wonders if the Christian faith should continue to be presented and defended mainly according to Enlightenment principles when growing criticism of modern thought is affecting virtually every discipline and if evangelicalism and its intellectual leaders ought to wait it out or whether they should re vision their theology This book is about contemporary evangelical approaches to the knowledge of God considering and suggesting ways Christian philosophers and theologians envision and make use of theological knowledge in the postmodern context The Love of Wisdom Steven B. Cowan,James

Spiegel,2009 This Christian based introduction to philosophy textbook is all the more appealing to its student audience for including humor and popular culture illustrations to teach important concepts **Self-Organizing Natural Intelligence** Myrna Estep,2006-12-26 Self Organizing Natural Intelligence brings new scientific methods to intelligence research that is currently under the influence of largely classical 19th century single causal theory and method This out dated classical approach has resulted in the single capacity g theory a central processor top down genetically determined linguistic view of intelligence that is directly contradicted by empirical facts of human and animal studies of intelligence This book proposes utilizes and demonstrates the research superiority of a highly developed multidisciplinary theory models approach to intelligence With conceptual tools concepts and mathematical methods more suited to continuous dynamic phenomena of living things the entire scope of natural intelligence based upon empirical studies of actual human and animal experience is addressed Results show that human and animal intelligence is largely self organizing and emergent across a spectrum of major categories of kinds of natural intelligence not limited to a single top down capacity as current proponents of the single capacity g theory and IQ approach support Contrary to the single capacity verbal theory of intelligence this work argues and shows evidence for three major categories of natural intelligence Overwhelming empirical evidence is given to show that our understanding of cognition itself must be broadened to include nonverbal immediate awareness as a category of natural

intelligence that is embedded within sensory and somatosensory motor processes that make possible yet another category of intelligence knowing how While most current theories of intelligence assume that the mind is entirely computational and also assume that sensation is cognitively neutral having no intentionality here empirical evidence is presented from numerous clinical studies showing that certain primitive sensory processes are not cognitively neutral nor do they require a representational language interface in order to be accessible to cognitive intelligence processes This volume describes a rigorous treatment and exhaustive classification of natural intelligence while also demonstrating a more adequate scientific and mathematical approach than current statistical and psychometric approaches shoring up the out dated and misused IQ hypothetical construct

**The Metaphysics of Memory** Sven Bernecker, 2008-04-04 This book investigates central issues in the philosophy of memory Does remembering require a causal process connecting the past representation to its subsequent recall and if so what is the nature of the causal process Of what kind are the primary intentional objects of memory states How do we know that our memory experiences portray things the way they happened in the past Given that our memory is not only a passive device for reproducing thoughts but also an active device for processing stored thoughts when are thoughts sufficiently similar to be memory related The Metaphysics of Memory defends a version of the causal theory of memory argues for direct realism about memory proposes an externalist response to skepticism about memory knowledge and develops a contextualist account of the factivity constraint on memory
