trauma you will be able to identify the support you ll need to heal and recover Build your recovery team and develop your action plan Useful tools and techniques will help you connect with and build your team of support professionals and advocates Once you begin working with your team you ll start the recovery process by acquiring a set of skills and techniques to help you weather the storm and begin healing Grieve mourn and let go Recovery will take you on a journey of grieving mourning and letting go which will transport you to a new sense of calm and acceptance I ll break down this journey into the stages you ll travel through to get to the other side Maintain your recovery Finally I ll share helpful ways to maintain your recovery manage setbacks with compassion and track your progress so you can proactively navigate the inevitably choppy waters as you continue your healthy and productive recovery Adapt and adjust to the impacts of the COVID 19 Pandemic The COVID 19 global Pandemic has left a lasting impact on all our lives This section will review the Pandemic's mental health physical health and social implications with helpful tools and techniques to help you manage the trauma and stress the Pandemic brings In addition gems of wisdom and learnings within the research literature will help you navigate the Pandemic and Post Pandemic worlds effectively Learn interactively with workbook exercises Workbook exercises will help you digest the content reflect on your situation learn from that reflection and incrementally create a personalized recovery plan Each exercise in the workbook walks you through a process of self reflection and self discovery to help you understand and make sense of your situation First Responder Careers Expose Individuals to Higher Risks of Developing Trauma Some careers include a higher likelihood of experiencing traumatic events that can lead to the development of PTSD Serving in the military is a high risk factor for developing PTSD However combat veterans develop PTSD at different rates depending on the severity and length of exposure to traumatic experiences There are also high incidences of reported sexual harassment and sexual abuse in the military As a result the rates of PTSD are relatively high compared to the overall prevalence in the general population Not only can law enforcement officers experience direct threats and stressful conditions but they also regularly witness the devastating effects of assaults robberies kidnappings and violent events However individuals in this profession have lower than expected rates of PTSD surprisingly An estimated 20 percent overall may result from having access to counseling and rigorous pre employment screenings EMTs and paramedics are routinely exposed to life threatening incidents and have more health problems than individuals in other occupations PTSD rates in this group are as high as 20 percent PTSD prevalence in this profession is comparable to law enforcement Firefighters conduct paramedic activities and are the first responders to natural disasters Firefighting is a dangerous profession that exposes workers to stressful conditions and traumatic events ranging from threats to their safety and experiencing the devastating effects of catastrophes As a result the prevalence of PTSD in this group can be as high as 20 percent Volunteer firefighters may have even higher rates because they don't have access to the same level of support as career firefighters. Healthcare workers especially those working in emergency rooms and intensive care units are also at higher risk For example nurses working in critical care

units are more likely to develop PTSD than nurses in other groups In addition while senior level nurses report fewer PTSD symptoms than junior ones they report higher rates of burnout Finally healthcare workers exposed to patients that have experienced violence such as an assault victim are more likely to develop PTSD than surgeons who treat assault victims Rescue workers medical workers and volunteers who act as first responders during disasters witness the aftermath of horrific events and can even become involved in severe traumatic events The prevalence of PTSD in these individuals has been estimated to be between 15 and 30 percent Journalists who work as war correspondents are at higher risk of being injured killed or kidnapped Their lifetime prevalence of PTSD which can be as high as 30 percent reflects their lack of access to support and PTSD treatment options Transit and train operators are frequently exposed to physical threats and witness suicide incidents such as person under train events Exposure to these traumatic and threatening circumstances can be a daily or weekly occurrence Bus drivers are more prone to PTSD because they have more direct contact with the general public than train drivers locked in secure train cabs In these high risk professions the incidence of trauma declines when policies are in place to debrief victims give victims immediate access to counseling and screen for individuals at high risk of having adverse reactions to traumatic conditions **Recovery Work Book** Graham Heys, 2014-05-02 This is a workbook which can be used in a group or one to one setting with a facilitator who can assist those studying it to explore each unit and question so that it becomes an individuals guide to what works for them to get and then keep them well A good hint is to fill the book out in pencil as time and circumstances and diagnosis change and what might work now might not work next year Recovery and Wellness Catana Brown, 2012-12-06 Learn to harness the process of recovery from or in five years time mental illness for use in the transformative healing of your OT clients This informative book for occupational therapists describes the Recovery Model from theoretical and experiential perspectives and shows how to use it most effectively It examines the major constructs of the model describes the recovery process offers specific OT approaches to support recovery and provides guidelines for incorporating wellness and recovery principles into mental health services This unique book you will show you how recovery in this case from schizophrenia can be used as a transformative healing process the challenges and benefits of a dual role as a mental health professional and a consumer of mental health services the story of one occupational therapist's journey of discovery in relation to her own mental illness why treating mental illness as a medical problem can be counterproductive to recovery three different teaching approaches the executive approach the therapist approach and the liberationist approach and how they lead to dramatically different outcomes the vital relationship between occupational therapy and recovery and wellness with an enlightening case study how to use the Adult Sensory Profile to evaluate and design interventions for sensory processing preferences a system for monitoring reducing and eliminating uncomfortable or dangerous physical symptoms and feelings how to establish partnerships between mental health researchers and persons with psychiatric disabilities **Psychosocial Occupational Therapy - E-BOOK** Nancy
