Complexity and Organization Robert Macintosh,Donald Maclean,Ralph Stacey,Douglas Griffin,2013-10-16 In the past decade complexity based thinking has exerted an increasing yet somewhat controversial authority over management theory and practice This has in some part been due to the influence of a number of high profile articles and the not inconsiderable hype which has accompanied them Another feature of the subject s development has been the diversity of the origins of the thinking and the claims which have been made for it in terms of managerial and organizational implications Complexity and Organization is the first text to bring this thinking together presenting some of the most influential writing in the field showing how the subject has developed and how it continues to influence managerial thinking Seminal contributions to the field have been brought together in a single accessible volume allowing readers to access what might otherwise appear a very diverse body of literature Moreover the editors who represent some of the leading thinkers and writers in this field have combined these readings with a unique commentary indicating not only the importance of the papers but teasing out the subtle but significant differences and similarities between them These commentaries take the form of a discussion between the editors debating the contribution that each paper has made to the field and the influence it has had on management thinking **Anthropologists, Indigenous Scholars and the Research**

Endeavour Joy Hendry, Laara Fitznor, 2012 This collection offers the fruits of a stimulating workshop that sought to bridge the fraught relationship which sometimes continues between anthropologists and indigenous native aboriginal scholars despite areas of overlapping interest Participants from around the world share their views and opinions on subjects ranging from ideas for reconciliation the question of what might constitute a universal science indigenous heritage postcolonial museology the boundaries of the term indigeneity different senses as ways of knowing and the very issue of writing as a method of dissemination that divides and excludes readers from different backgrounds This book represents a landmark step in the process of replacing bridges with more equal patterns of intercultural cooperation and communication
