**Social Justice and Education in the 21st Century** Willie Pearson Jr., Vijay Reddy, 2021-04-10 The world is not an equal place There are high and low income countries and high and low income households For each group there are differential educational opportunities leading to differential educational outcomes and differential labor market opportunities This pattern often reproduces the privileges and inequalities of groups in a society This book explores this differentiation in education from a social justice lens Comparing the United States and South Africa this book analyzes each country s developmental thinking on education from human capital and human rights approaches in both primary and higher education The enclosed contributions draw from different disciplines including legal studies sociology psychology computer science and public policy

**Financing Higher Education Worldwide** D. Bruce Johnstone, Pamela N. Marcucci, 2010-06-07 No issue in higher education is as salient or as controversial as finance As demand for higher education around the world grows so do the costs associated with it especially as governments shoulder less of the burden Tuition fees rise and student loan debt grows Who pays for these surging costs Who should pay D Bruce Johnstone and Pamela N Marcucci examine the universal phenomenon of cost sharing in higher education where financial responsibility shifts from governments and taxpayers to students and families They find that growing costs for education far outpace public revenue streams that once supported it Even with financial aid and scholarships defraying some of these costs students are responsible for a greater share of the cost of higher education Featuring comprehensive economic and policy data the authors international comparative approach shows how economically diverse countries all face similar cost sharing challenges So who should pay for higher education While cost sharing is both politically and ideologically debated Johnstone and Marcucci contend that for almost all countries it is imperative for the financial health of colleges and universities bringing better efficiency equity and responsiveness Financing Higher Education Worldwide combines sophisticated economic explanations with sensitive political and cultural analyses of the financial pressures facing higher education throughout the world

**Student Financing of Higher Education** Donald Heller, Claire Callender, 2013-06-07 The financing of higher education is undergoing great change in many countries around the world In recent years many countries are moving from a system where the costs of funding higher education are shouldered primarily by taxpayers through government subsidies to one where students pay a larger share of the costs There are a number of factors driving these trends including A push for massification of higher education in the

recognition that additional revenue streams are required above and beyond those funds available from governments in order to achieve higher participation rates

Macroeconomic factors which lead to constraints on overall government revenues

Political factors which manifest in demands for funding of over services thus restricting the funding available for higher tertiary education

A concern that the returns to higher education accrue primarily to the individual rather than to society and thus students should bear more of the burden of paying for it

This volume will help to contribute to an understanding of how these trends occur in various countries and regions around the world and the impact they have on higher education institutions students and society as a whole

With contributions for the UK USA South Africa and China this vital new book gives a truly global picture of the rapidly changing situation

Going to University Case, Jennifer, Marshall, Delia, 2018-02-09

Around the world more young people than ever before are attending university

Student numbers in South Africa have doubled since democracy and for many families higher education is a route to a better future for their children

But alongside the overwhelming demand for higher education questions about its purposes have intensified

Deliberations about the curriculum culture and costing of public higher education abound from student activists academics parents civil society and policy makers

We know from macro research that South African graduates generally have good employment prospects

But little is known at a detailed level about how young people actually make use of their university experiences to craft their life courses

And even less is known about what happens to those who drop out

This accessible book brings together the rich life stories of 73 young people six years after they began their university studies

It traces how going to university influences not only their employment options but also nurtures the agency needed to chart their own way and to engage critically with the world around them

The book offers deep insights into the ways in which public higher education is both a private and public good and it provides significant conclusions pertinent to anyone who works in and cares about universities

**Fees Must Fall** Susan Booysen, 2016-10-01

This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt

FeesMustFall the student revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa

More broadly it radically questioned the socio political dispensation resulting from the 1994 social pact between big business the ruling elite and the liberation movement

The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left

Yet its objectives are more complex than those of earlier struggles

The student movement has challenged the hierarchical top down leadership system of university management and it s double speak of professing to act in workers and students interests yet entrenching a regressive system for control and governance

University managements while on one level amenable to change have also co opted students into their ranks to create co responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution

This book maps the contours of student discontent a year after the start of the FeesMustFall revolt

Student voices dissect

colonialism improper compromises by the founders of democratic South Africa feminism worker rights and meaningful education In depth assessments by prominent scholars reflect on the complexities of student activism its impact on national and university governance and offer provocative analyses of the power of the revolt
