In 1964 noted literary critic Leslie Fiedler described American youth as new mutants social rebels severing their attachments  
to American culture to remake themselves in their own image 1960s comic book creators anticipating Fiedler began to  
morph American superheroes from icons of nationalism and white masculinity into actual mutant outcasts defined by their  
genetic difference from ordinary humanity These powerful misfits and freaks soon came to embody the social and political  
aspirations of America's most marginalized groups including women racial and sexual minorities and the working classes In

**The Science Fiction Film in Contemporary Hollywood** Evdokia Stefanopoulou, 2023-07-27

The Science Fiction Film in Contemporary Hollywood focuses on the American science fiction SF film during the period 2001-2020 in order to provide a theoretical mapping of the genre in the context of Conglomerate Hollywood. Using a social semiotics approach in a systematic corpus of films, the book argues that the SF film can be delineated by two semiotic squares: the first one centering on the genre's more-than-human ontologies (SF bodies) and the second one focusing on its imaginative worlds (SF worlds). Based on this theoretical framework, the book examines the genre in six cycles which are placed in their historical context and are analyzed in relation to cultural discourses such as technological embodiment, race, animal-human relations, environmentalism, global capitalism, and the techno-scientific Empire. By considering these cycles, which include superhero films, creature films, space operas, among others, as expressions of the genre's basic oppositions, the book facilitates the comparison and juxtaposition of films that have rarely been discussed in tandem, offering a new perspective on the multiple articulations of the SF film in the new millennium.
