Emergency Medical Services Institute of Medicine, Board on Health Care Services, Committee on the Future of Emergency Care in the United States Health System, 2007-06-03 Emergency Medical Services EMS is a critical component of

our nation's emergency and trauma care system providing response and medical transport to millions of sick and injured Americans each year. At its best, EMS is a crucial link to survival in the chain of care, but within the last several years, complex problems facing the emergency care system have emerged. Press coverage has highlighted instances of slow EMS response times, ambulance diversions, trauma center closures, and ground and air medical crashes. This heightened public awareness of problems that have been building over time has underscored the need for a review of the U.S. emergency care system. *Emergency Medical Services* provides the first comprehensive study on this topic. This new book examines the operational structure of EMS by presenting an in-depth analysis of the current organization, delivery, and financing of these types of services and systems. By addressing its strengths, limitations, and future challenges, this book draws upon a range of concerns. The evolving role of EMS as an integral component of the overall health care system, EMS system planning, preparedness, and coordination at the federal, state, and local levels, EMS funding and infrastructure investments, EMS workforce trends, and professional education, EMS research priorities, and funding. *Emergency Medical Services* is one of three books in the *Future of Emergency Care* series. This book will be of particular interest to emergency care providers, professional organizations, and policy makers looking to address the deficiencies in emergency care systems. *Code of Federal Regulations*, 2014 Special edition of the Federal Register containing a codification of documents of general applicability and future effect as of July 1 with ancillaries.

Conservation and Recreation in Protected Areas Yun Ma, 2016-05-12. This book provides a comprehensive and up-to-date comparative study of the management and resolution of conflicts between conservation and recreation in protected areas in the US and China. Competing claims on the use of nature, increasing regulation of land use, and recreational activities, and the conflicting goals between conservation and development have led to a rise in conflicts in the designation and management of protected areas. How to effectively manage and resolve these conflicts has become a challenge for both legislators and managers. By adopting an institutional dimension in legal interpretation, this book critically examines how such conflicts are dealt with in the legal regimes of the US and China while exploring interactions between legislatures, agencies, and courts. The book searches for a plausible solution to improve the legal framework of protected areas in China by emulating pertinent mechanisms developed in the US, whilst also presenting legal and policy recommendations to the US. This informative book will be useful for legal scholars in Chinese law, nature conservation law, administrative law, and comparative law.
