Newman,2010-09 Is globalization making our world more equal or less Proponents of globalization argue that it is helping and that in a competitive world no one can afford to discriminate except on the basis of skills Opponents counter that globalization does nothing but provide a meritocratic patina on a consistently unequal distribution of opportunity Yet despite the often deafening volume of the debate there is surprisingly little empirical work available on the extent to which the process of globalization over the past quarter century has had any effect on discrimination Tackling this challenge *Discrimination in an Unequal World* explores the

relationship between discrimination and unequal outcomes in the appropriate geographical and historical context. Noting how each society tends to see its particular version of discrimination as universal and obvious, the editors expand their set of cases to include a broad variety of social relations and practices. However, since methods differ and are often designed for particular national circumstances, they set the much more ambitious and practical goal of establishing a base with which different forms of discrimination across the world can be compared. Derived from a broad array of methods, the book draws many important lessons on the new means by which the world creates social hierarchies, the democratization of inequality, and the disappearance of traditional categories.

**Youth and Higher Education in Africa. The Cases of Cameroon, South Africa, Eritrea and Zimbabwe** Donald P. Chimanikire, 2009. Student activism in Africa at least since the early 1990s has been preoccupied with popular struggles for democracy in both their respective countries and institutions of higher learning. The changing socio-economic and political conditions in many African countries, characterized by the decline in economic growth and the introduction of multi-party politics among several other factors, have had different impacts on students and student political organizations in African universities. This book recounts the responses of students to these changes in their attempt to negotiate better living and studying conditions. The four case studies contained in the book—Cameroon, South Africa, Zimbabwe, and Eritrea—clearly reveal the very important aspects of the situation in which African students find themselves in many countries and underscores the need to understand the character and development of higher education on the continent. Ministries of Higher Education, Vice Chancellors, Deans of Students, Student Unions, and parents will find this book very useful in terms of understanding the tensions that often arise at institutions of higher learning and why solutions seem to be elusive.

**Social Justice and Education in the 21st Century** Willie Pearson Jr., Vijay Reddy, 2021-04-10. The world is not an equal place. There are high and low income countries and high and low income households. For each group, there are differential educational opportunities leading to differential educational outcomes and differential labor market opportunities. This pattern often reproduces the privileges and inequalities of groups in a society. This book explores this differentiation in education from a social justice lens. Comparing the United States and South Africa, this book analyzes each country's developmental thinking on education from human capital and human rights approaches in both primary and higher education. The enclosed contributions draw from different disciplines including legal studies, sociology, psychology, computer science, and public policy.
